Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 recites the limitation "the templates" in line 1. There is insufficient antecedent basis for this limitation in the claim (the claim should be depend from claim 3).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 are rejected under 35 U.S.C. 102(b) as being anticipated by the article "Real-time discrimination of battlefield ordinance using remote sensing data" to Hagerty et al.

As to claim 1, Hagerty discloses a system for determining a military threat level associated with a collection of detected objects imaged within a geographical area of interest, the system comprising:

a data detector (remote sensor) for detecting and imaging objects located within the geographical area (battlefield) of interest (page 330 right column);

a threat intensity detector for determining the intensity of detected objects within the area of interest (page 329 section 1+, note that ordinance classification reports can be used a determination of intensity of detected objects (ordinance) and threats); and

a threat immediacy detector for determining the immediacy the threat (early indication and warning of threat) posed by the detected objects based on an organizational pattern (features) of the detected objects (page 329-330, section 1, page 331, and page 337 section 6).

As to claim 2, Hagerty further discloses the threat intensity detector generates a density image (features class image, abstract) .

### ***Subject Matter Not Taught In The Prior Art***

Subject Mater taught in the claim 11 is not found in the prior art. However, Examiner can not indicate allowability of these claims because of insufficient antecedent basis as addressed with regard to 35 U.S.C. 112 rejection.

### ***Allowable Subject Matter***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 4-10 depend from claim 3 are, therefore, objected.

Claim 12 are allowed. Claims 13-22 depend from claim 12 are, therefore, allowed.
